

INSTITUTIONAL DISTINCTIVENESS

The institutional performance in one area distinctive to its vision, priority and thrust is as follows:

The **Mission** of our college is **Women Empowerment**. Under this mission there is also institution's **Vision: To Create Complete Personalities Through Value Based and Career Oriented Education**.

The college has started two UGC – COC courses i.e. Computer Hardware and Fashion Designing. The college has also started three certificate courses in Spoken English, Yoga and Arabic Language. Recently, the college introduced UGC- B. Voc degree programme.

B. Voc is one of the career oriented courses which is run by our college. This is three years degree course. Students complete it in the first year get a diploma certificate, after second year they get advance diploma certificate and after completion of three year the B. Voc. Degree is awarded.

B. Voc. Fashion Technology is a complete course which reflects our vision i.e. 'To Create Complete Personalities Through Value Based and Career Oriented Education'. Here, this programme is totally career oriented. Here, in this programme, the students are taught different skills about garments and jewelry designs. As well as preparing things from waste or something this is discarded as useless. The emphasis is given on the practical works than theoretical works. Practical are taken excessively to make them perfect in their skills. For that, college always organized industrial visit at Ichalkaranji and Paithan. Students observe the work and learn how to handle the cotton and garment machines. They are also given training in the same industry.

For the development of students skills, seminar and workshops are also organized by the college. The implications of these actively can be seen in the things and designs which are prepared by the students. Students become independent due to this course. They do not have to wait to get a job in any industry. They become able to start their own business. The Course is not only run by the college but the placement is also made available to the students in the garment industry.

This department organizes jewelry and handloom exhibitions. Students prepare different jewelry designs. They are kept in exhibition. In this exhibition, students have given freedom to sale the designs of jewelries and garments which are prepared by B. Voc. (F.T.) students. Therefore, it can be said that if they did not get a job, they will start their own business.

In this way, the other courses are run by the college, which creates complete personalities. In B. Voc. Fashion Technology they are also taught language, communication skills and how to handle telephone interviews etc. Because of this activity they will be able to perform nicely in their academic career as well as in their future.
